

## SELL PRODUCTS AND TICKETS ON LOCATION WITH AGILITY POS

With the number of global mobile POS devices expected to increase to 54 million in 2019, there is no doubt that POS is fast becoming an integral way of selling your products and tickets to customers. However, POS solutions can often rely heavily on cumbersome hardware and prove challenging to set up every time.

### > THE CHALLENGES

- Over-reliance on manual processes
- Hard-to-manage software and connectivity complications
- Overcomplicated and inconvenient hardware options
- Inefficient on-location selling processes
- Lack of consistency in user experience across touchpoints
- Security risks during transactions

### > THE AGILITY EXPERIENCE

- Seamless hardware integrations and smartphone compatibility
- Top-of-the-line wireless hardware with Bluetooth connectivity
- Mobile-friendly user experience and mobile ticket generation
- Increased efficiency with customized design around existing workflows
- Consistent design across site and POS touchpoints
- Fraud-free, risk-free payment options

With **AGILITY POS** you can now sell tickets and products on location using our top-of-the-line hardware and dedicated mobile app. Our POS solution is customizable and tailored around your existing workflows, ensuring that our platform serves you and not the other way around.

All POS content and tools are managed from a central hub along with your CMS platform, so there is never any need to juggle multiple platforms or input information several times.

With Agility POS you will be able to easily set up and replicate a pop-up storefront no matter where you are, whether it's a tourism centre, an airport, a festival or a trade show.
