

# An Agile Approach To Competitive Intelligence

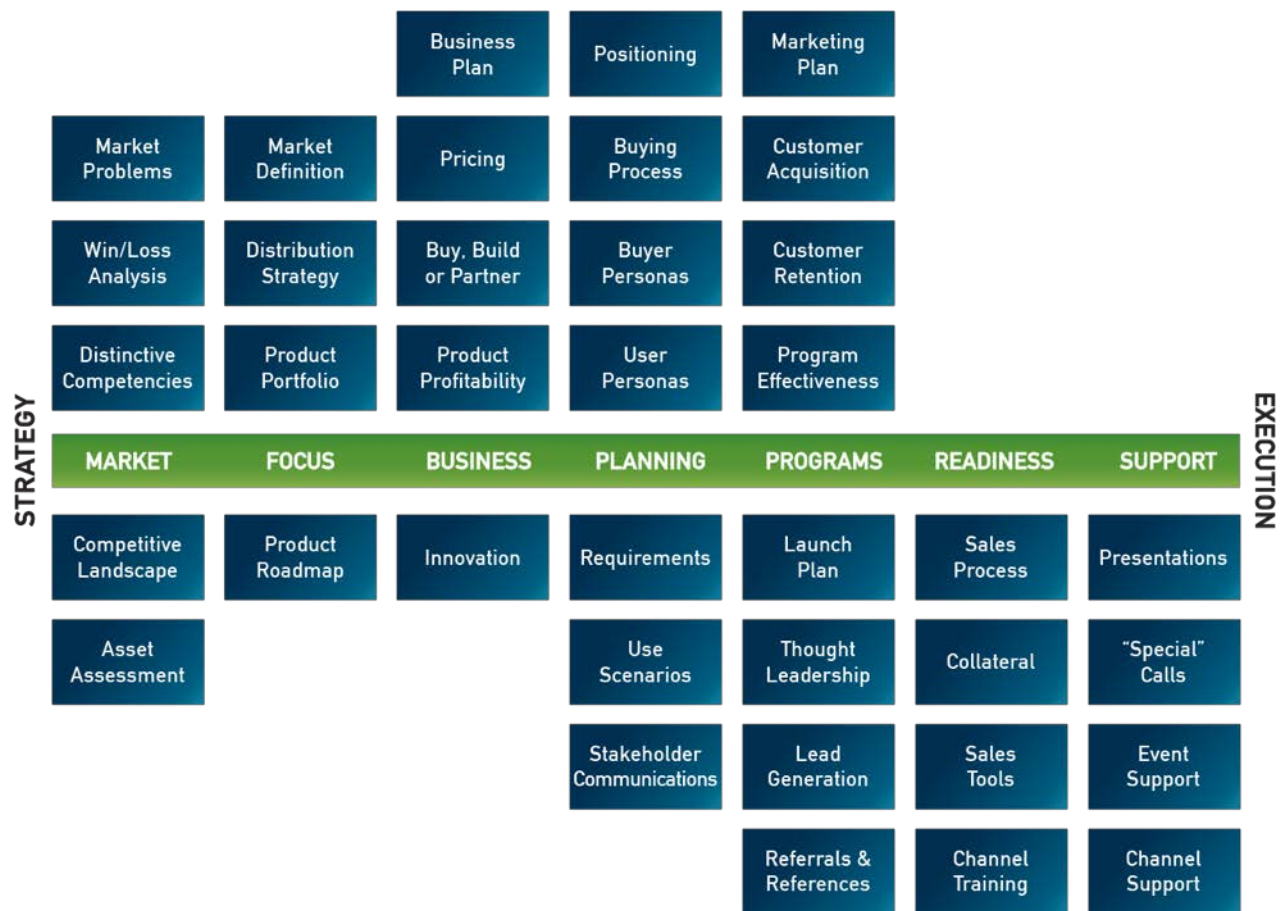

Pragmatic Marketing

Alan Armstrong  
CEO & Founder  
Eigenworks Inc.

# about us

Experts in technology  
product management and  
product marketing

Specialize in  
training

Trained hundreds of thousands  
of people at thousands of  
companies since 1993

# presenter

## Alan Armstrong

Alan Armstrong is founder and CEO of Eigenworks, a boutique strategy and research firm that services B2B software companies ranging from series-B startups through large public companies. Prior to founding Eigenworks, Alan held senior director and vice president roles at Product Management, Business Development, and Sales startups, and was Sitraka's Director of New Products and Innovation. He founded Toronto Product Management Association and is a contributor of content and expertise to industry publications, talks, and webinars including Pragmatic Marketing, and the popular blog OnProductManagement, of which Alan is a co-founder.

He speaks regularly at industry events, including PULSE, Technology Services World (TSW), Strategy & Competitive Intelligence Professionals (SCIP), and Product Marketing Community (PMC).

Alan holds a B.A.Sc in Systems Design Engineering from the University of Waterloo.

# Agenda

- Three Dysfunctions of Competitive Intelligence Efforts
- Using Modern Agile to Accelerate CI Efforts
- Seeding Agile CI Movement and Additional Resources

---

poll

---

# What title best describes your role?

---

poll

---

**How would you  
describe your use of  
Agile in Strategy, CI,  
and Marketing?**

---

poll

---

**What one word best describes your CI function?**

# Three Dysfunctions of Competitive Intelligence Efforts

→ 01

## Competitor Centric

Most CI functions focus on following *competitors*, which leads to undifferentiated look-alike offerings.

+

→ 02

## Ad Hoc Execution

Most CI Teams react to incoming sales pressure without setting a strategic direction for their CI efforts.

+

→ 03

## Feature Centric

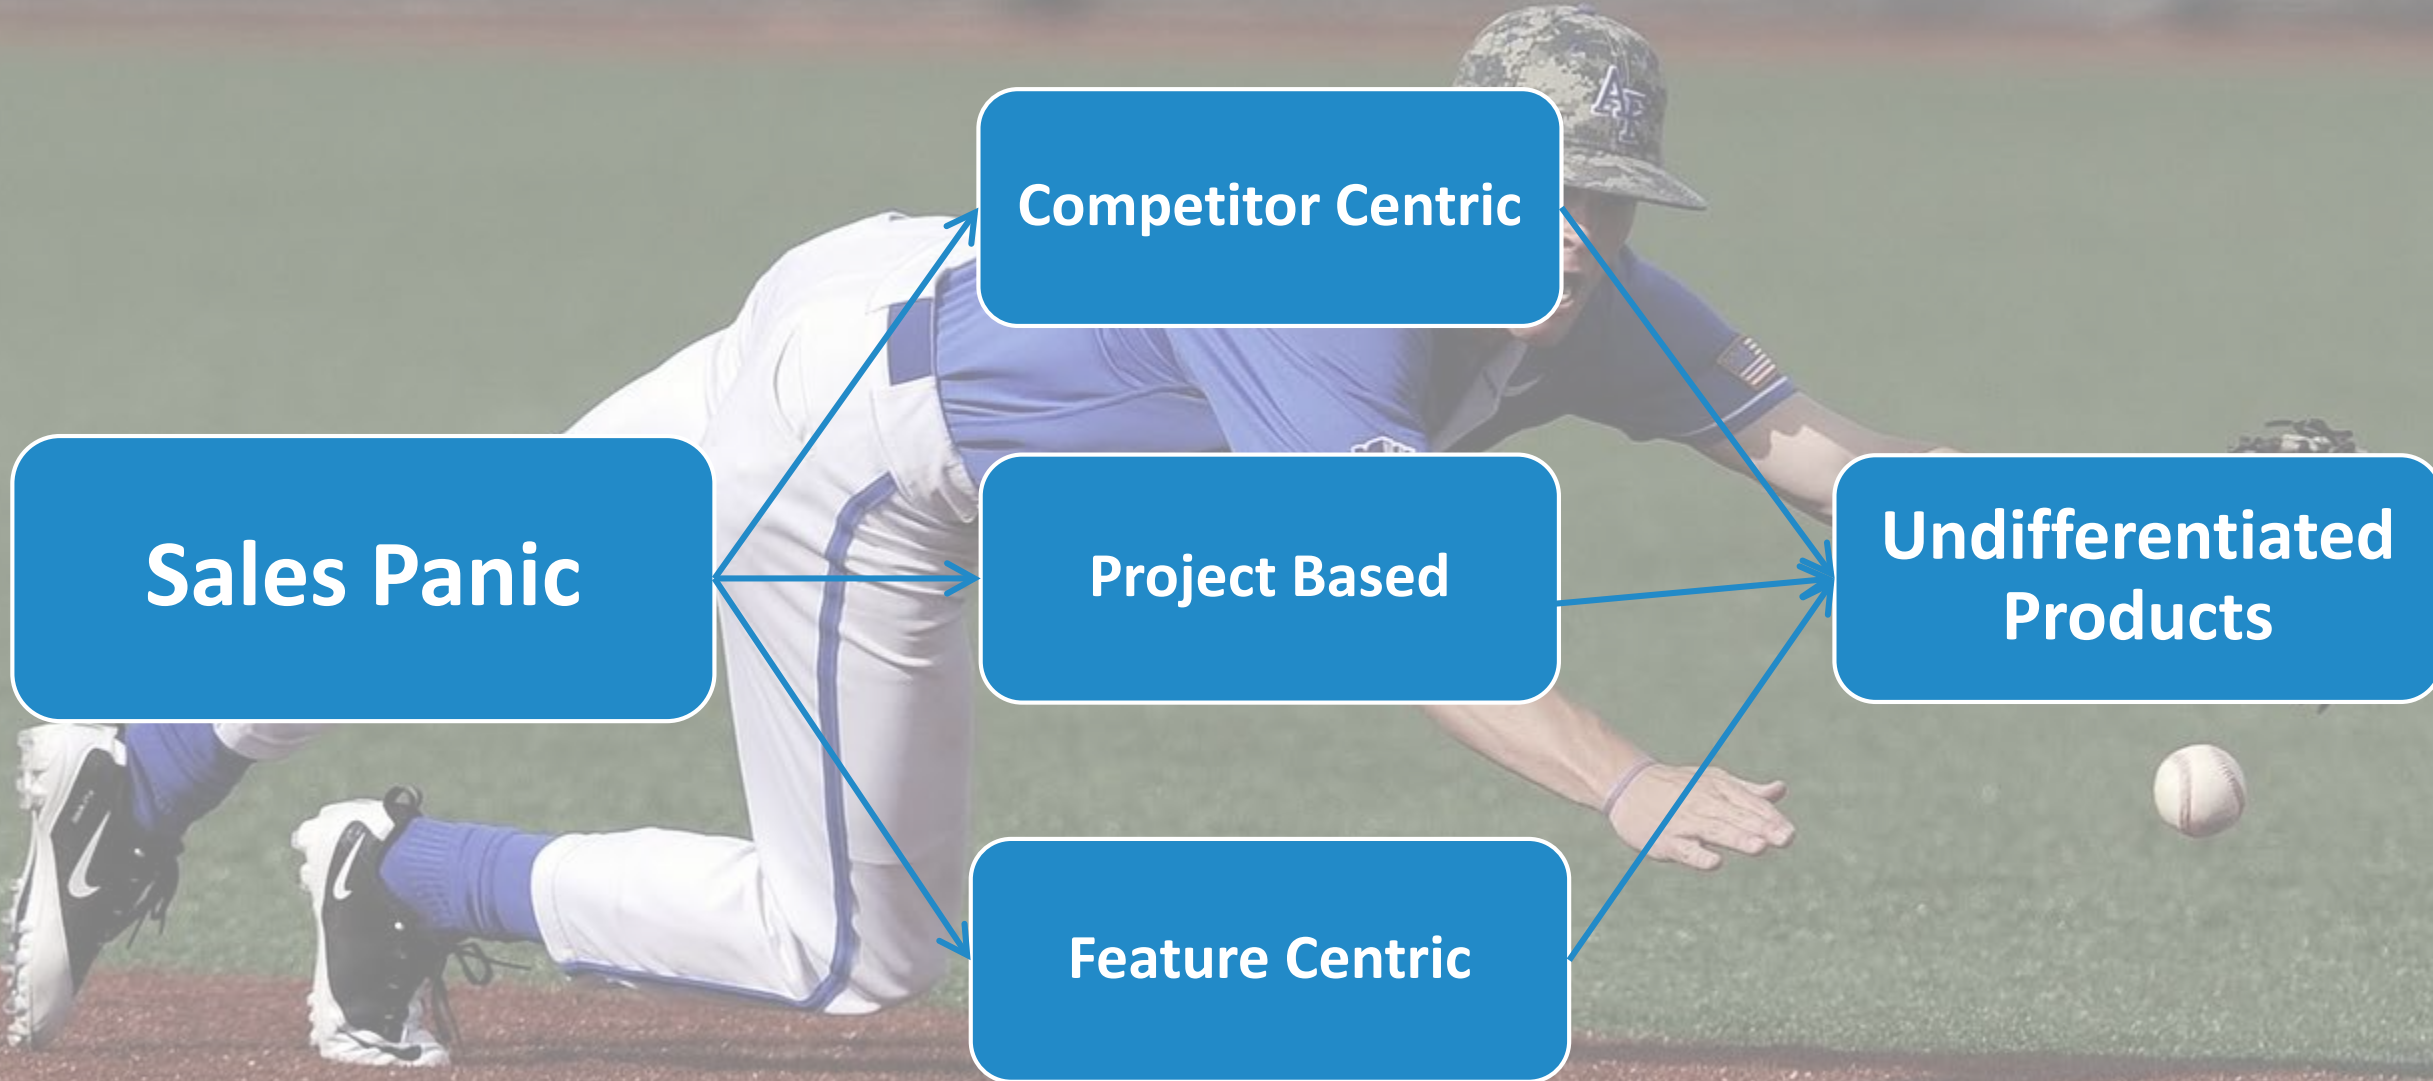

Most product teams focus on product features, despite the fact that customers have broad selection criteria.

+

Most competitive intelligence is reactive

**Sales Panic**

**Competitor Centric**

**Project Based**

**Feature Centric**

**Undifferentiated Products**

# Most CI focuses on Competitor Research

A photograph of a baseball game in progress. In the foreground, a player in a white uniform with red accents and the number 17 on his back is running towards the right. He is wearing a red helmet and white pants with a red stripe. A player in a grey uniform with the number 32 on his back is running towards the left, attempting to tag the first player. The player in grey is wearing a dark cap and grey pants. The background shows a baseball field with brown dirt and green grass. The text "Let's turn this around" is overlaid on the left side of the image.

Let's turn  
this around

# Modern Agile: Simpler, sturdier, streamlined ways to be agile

Drawing on 10+ years of agile deliver, ModernAgile.org founders have simplified the Agile Manifesto into Guiding Principals that streamline agile adoption.

# Using Modern Agile for Competitive Intelligence

Awesome: Focus on the Hero's Journey of your Buyer

CI Value = Insights  
Deliver Insights Continuously.

Safety = Experimental attitude  
It's OK to be wrong

Be Responsive to Emerging Questions

# Step 1

*With apologies to  
Simon Sinek*

# Step 1

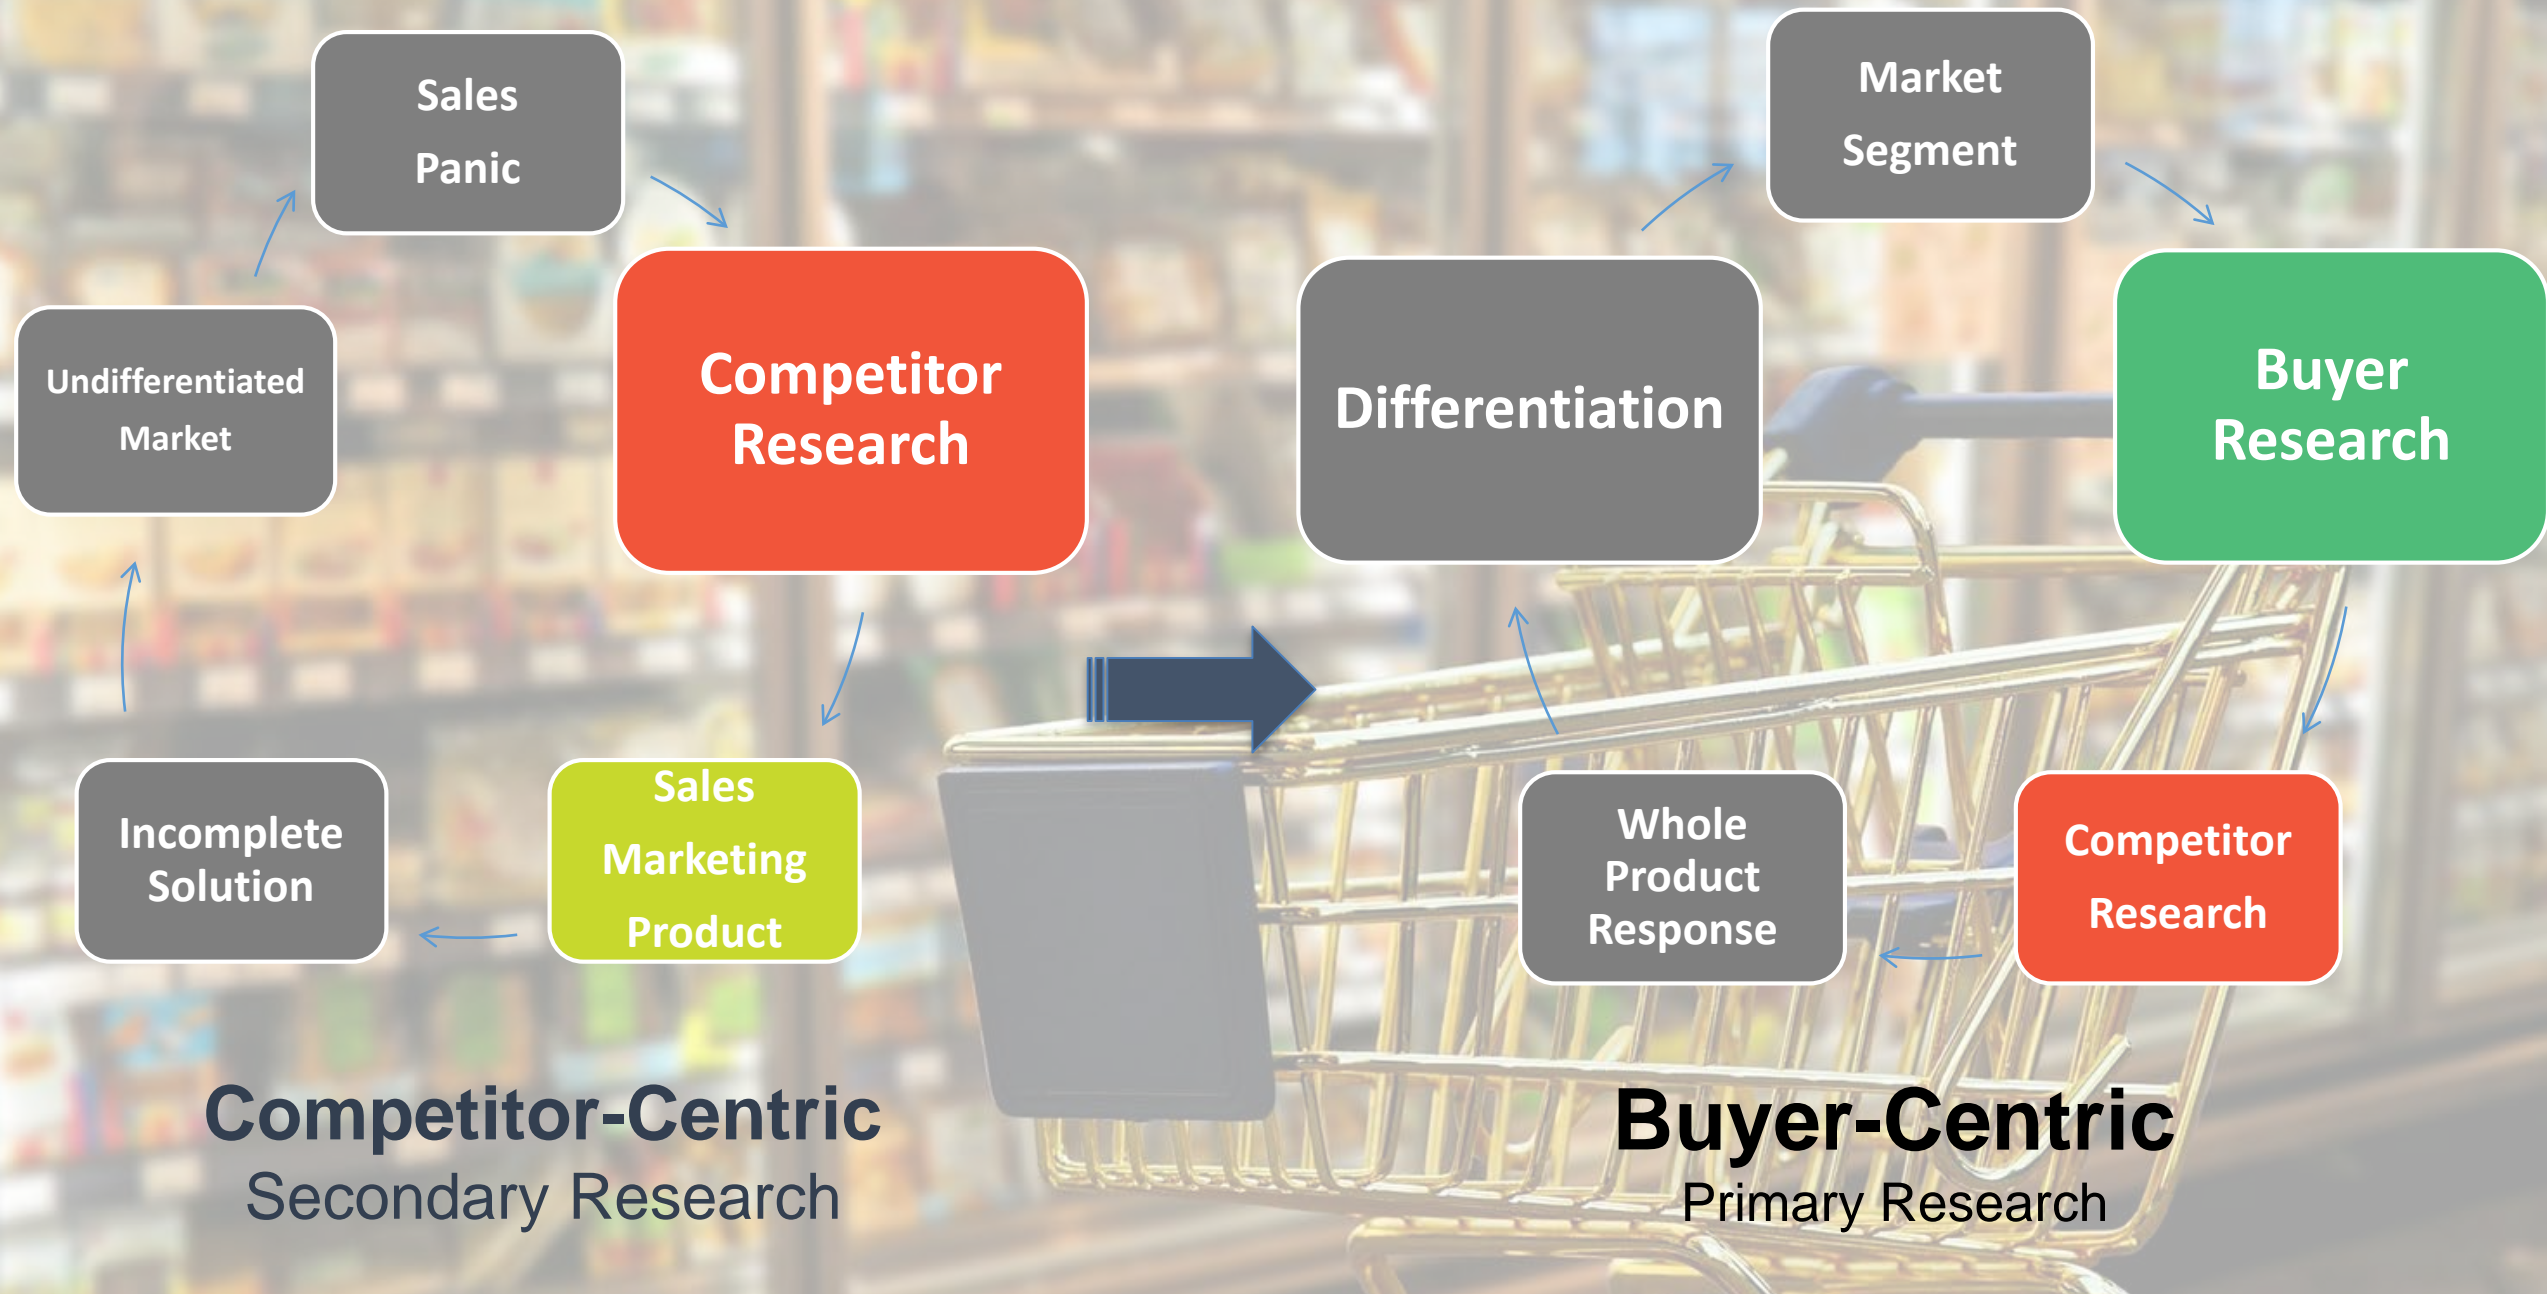

FOR MORE RESOURCES:  
<http://eigenworks.com/pragmatic>

# START WITH BUY

*But how do we make buyers awesome ... ?*

An aerial photograph of a vast mountain landscape. A light-colored river winds through a deep valley, forming several large, sweeping loops. The mountains are rugged and covered in sparse vegetation, with some peaks appearing rocky. The sky is filled with soft, white clouds, and the overall lighting suggests a bright but slightly hazy day.

Profile the high-stakes outcomes your  
buyers need to achieve ...

Engage buyers as a  
**hero** in their own  
journey

Use the  
Buyer-as-Hero™  
approach to profiling  
buyers to deliver  
differentiated insights

An aerial photograph of a vast mountain range with a winding river cutting through the valleys. The river forms several large loops and meanders, creating a stark contrast with the rugged, brownish-green terrain. The sky is filled with soft, white clouds, and the overall atmosphere is one of grandeur and scale.

The buyer's journey is a heroic quest.

**FΔ**

*Fundamental Delta*

The buyer seeks **change**.  
We call this Fundamental Delta.

***Competitive strengths and weaknesses  
must all be measured by how  
they impact the buyer achieving FΔ.***

# Agile Competitive Intelligence: Blackbaud Case Study

Allison Van Diest | [Allison.VanDiest@blackbaud.com](mailto:Allison.VanDiest@blackbaud.com)

With 30 years of experience, Blackbaud's complete suite of fundraising solutions helps nonprofit organizations build lifelong support and raise more money.

**Allison Van Diest is Blackbaud's Director of Competitive and Market Intelligence.** She has proudly been a part of the Blackbaud team for 15 years, helping to ensure clients' continued success with their nonprofit solutions.

# Making the Shift to Agile CI ... *before: Isolated Project-Based Research*

**Major  
Competitor  
CI Project**  
(How are they  
beating us?)

**Product-  
Specific  
CI Project**  
(What's working,  
what's not)

**Market  
Vertical  
CI Project**  
(How can we  
accelerate sales in  
a particular  
vertical?)

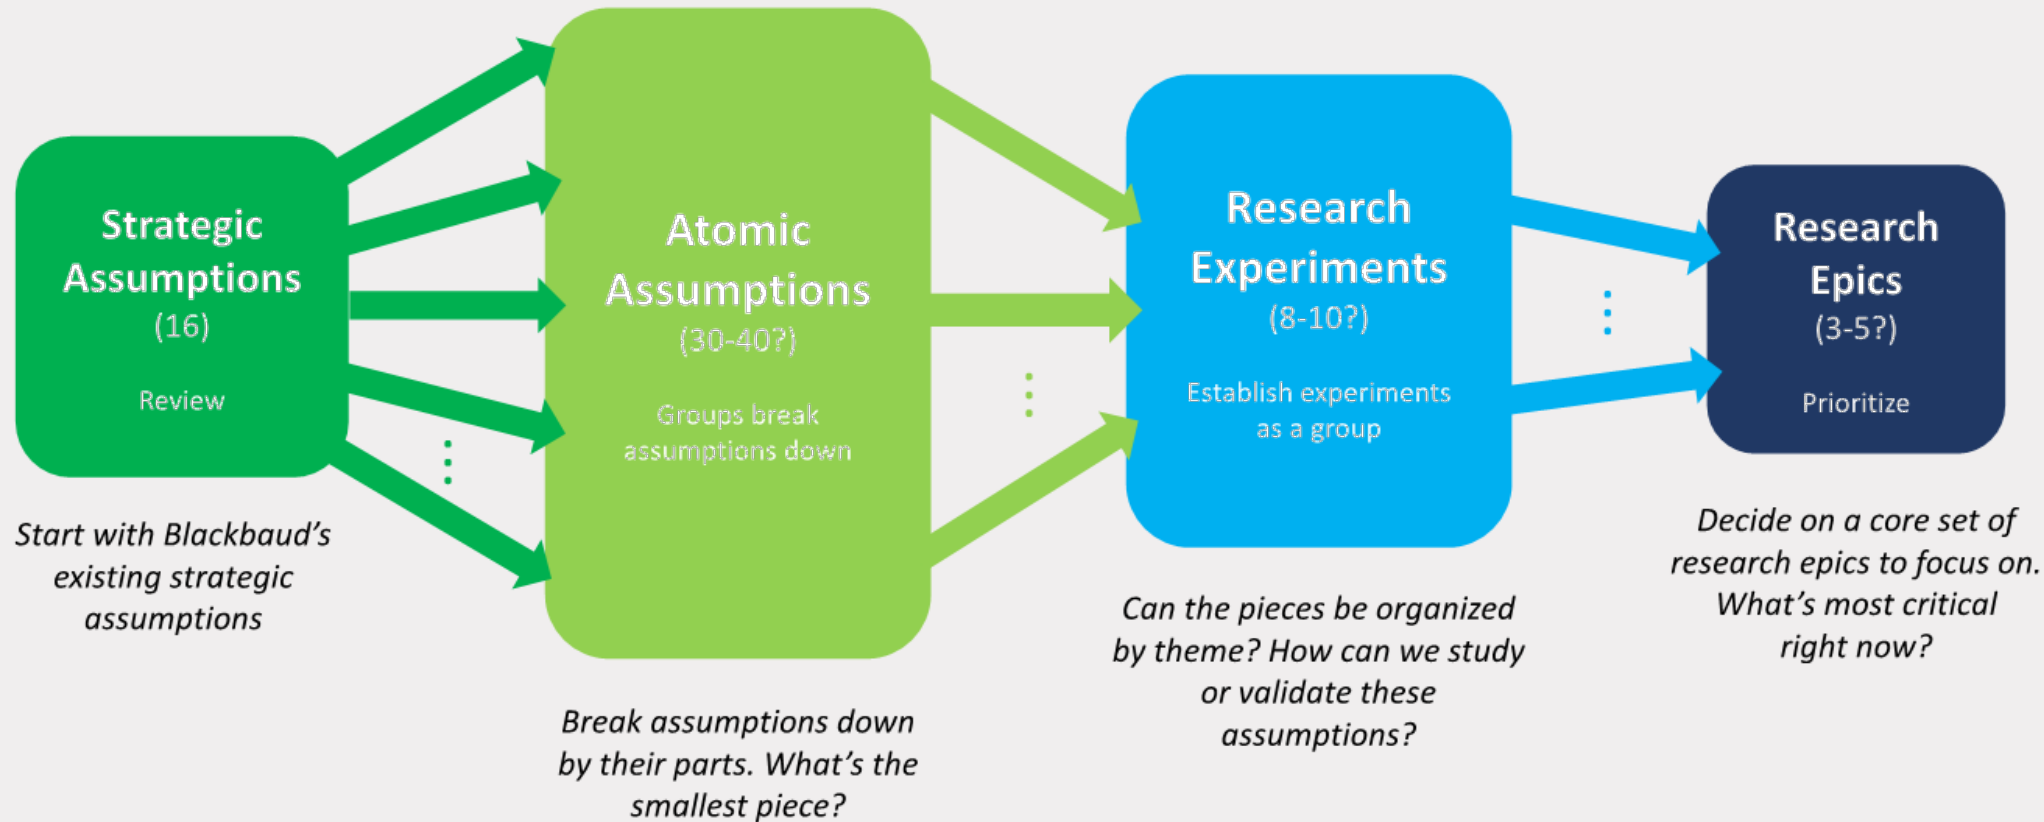

Separate projects, researched in isolation of one another

<http://eigenworks.com/pragmatic>

# Making the Shift to Agile CI

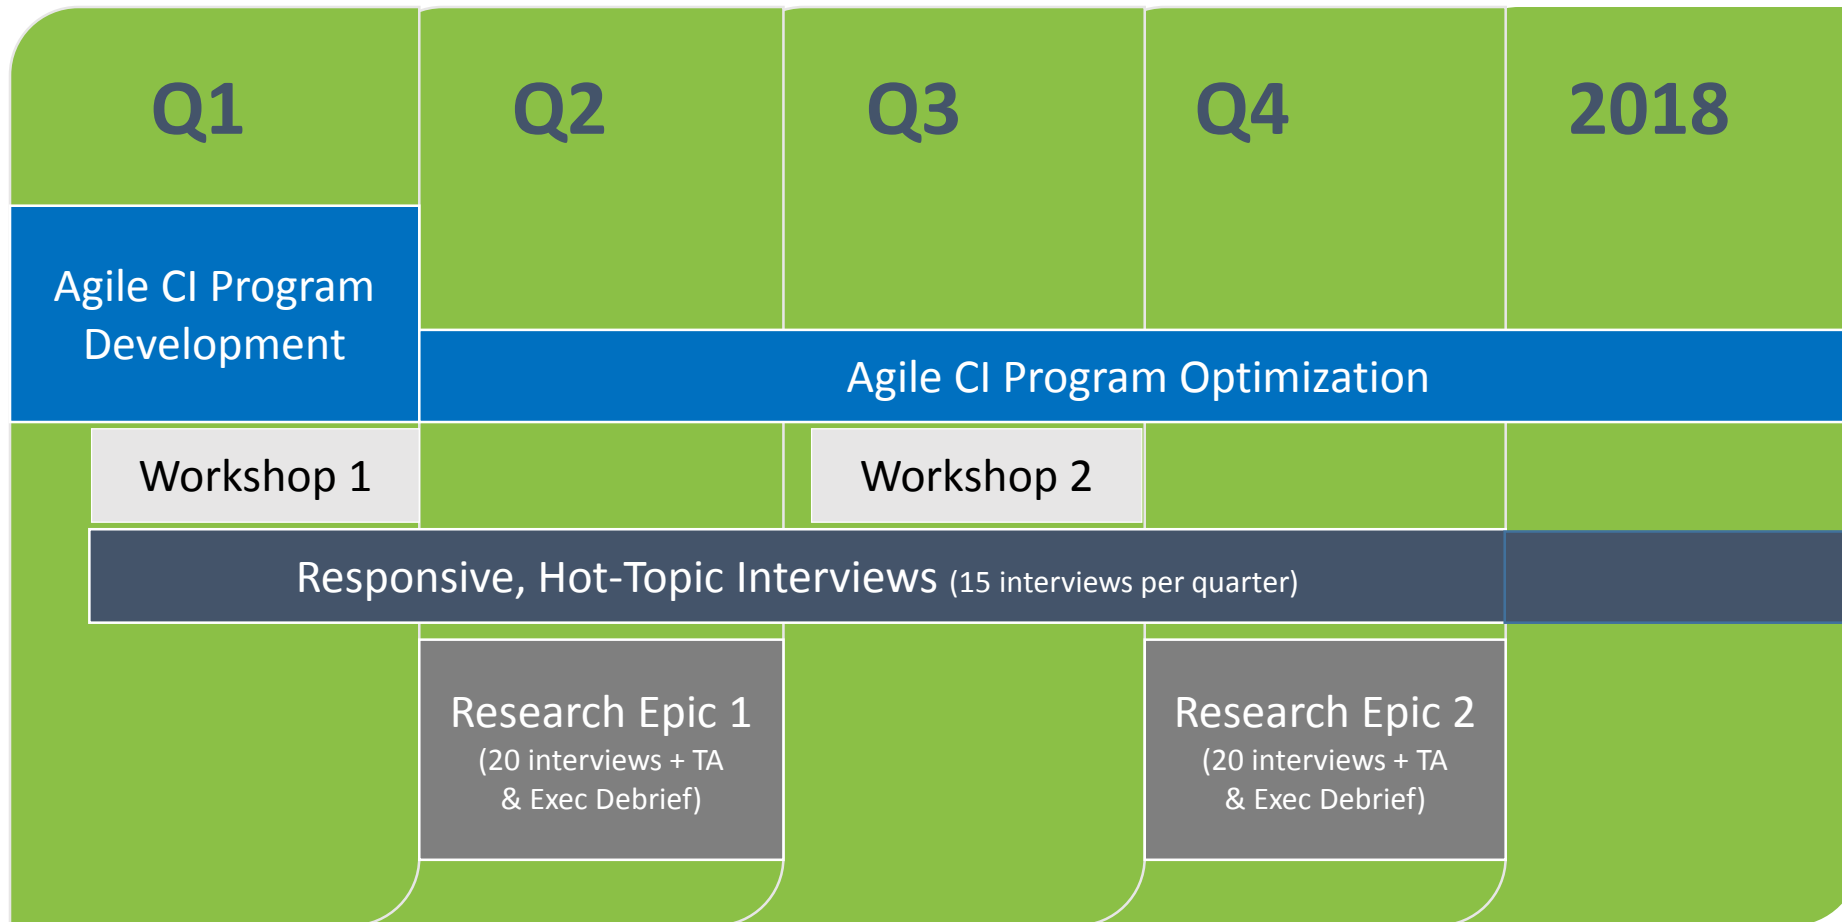

- Catalog strategic assumptions that can be translated into research experiments
  - What assumptions pose the greatest risk?
  - What type of intelligence do we need?
- Prioritize “research experiments”
- Encourage a culture of learning with continuous, actionable feedback

# Building the Backlog: Strategic Assumptions -> Atomic Assumptions

# What does a Buyer-Centric Agile CI Program look like?
