

### **Check out our classes at the School of Aviation and Aerospace Technology**

Welcome to our Canadore College Aviation campus. Remember, this is a 360 video so move your head around so you can see the different areas around our labs.

Canadore's School of Aviation is located in North Bay, Ontario. But where is North Bay, Ontario? North Bay is a short three-hour four lane drive from Downtown Toronto right into the middle of the province. I personally come from Windsor, Ontario and I absolutely adore here. And you will too. If you want to succeed in the field of Aviation, come to Canadore College. Great things happen here.

Here at Canadore College we have professors that come right out of the industry to teach us what we need to know to thrive and succeed after graduation. We have top-notch facilities such as this room, the helicopter lab. Where right now we're learning about the flap restraint assembly. The flap restraint assembly prevents excessive flapping at low RPM for safety reasons.

Our aviation campus is right around the corner from the North Bay airport. A lot of schools like to brag about how they have the industry right at their doorsteps, we actually do. Come and tour our campus! \
