Technology Readiness Guide for Students

The purpose of this guide is to support students in developing technological skills that support success in college, work, and life by:

- Helping students assess their technological readiness; and
- Providing resources for essential computer and software skills.

If you have any questions about this guide please contact Student Success Services by emailing studentsuccessnow@canadorecollege.ca or leaving a voicemail at 705.474.7600 or 1.855.495.7915 (toll free), extension 5205.

Getting started

Start by gathering important information about how your program will be delivered in Fall 2021. First review the academic delivery plan to determine if your program will be fully remote, partially remote, or fully on-site. Next review Canadore's Bring Your Own Device to determine what technology is recommended for your program. If you have any questions about your program delivery plan or technology requirements, please contact your Program Coordinator.

Assessing your technological readiness

Digital literacy skills are defined as the essential skills you need to use a computer and the internet for college, work, and daily life. You can learn more about digital literacy and why it matters by watching this video from University of Derby Digital (2:54 minutes).

Digital literacy and why it matters
117,793 views • Nov 5, 2014   👍 311   👎 22   ➔ SHARE   ≡+ SAVE   ....

Northstar Digital Literacy provides free online, self-guided modules that assess your ability to perform these tasks. After the assessment is complete, you will receive a report that identifies skills you have mastered and skills you can improve upon.
