

Truck and Coach Technician

Dual Credits: two high school credits and Level 1 Truck and Coach Technician

Truck and Coach Technician – TTD4Y (College Course: 310T) Level 1 In-school Curriculum

This apprenticeship provides students with the training to disassemble, adjust, repair and reassemble engines, transmissions, clutches, rear ends, differentials, brakes, drive shafts, wheels and rims, axles and other assemblies. Apprentices can expect to perform diagnoses and corrections on faults in alignment of wheels and steering, suspension systems, electrical systems, emission control and engine management systems, as well as air conditioning and refrigeration/heating systems.

This is a theory-based course; students taking this program should either have already taken co-operative education in a related field or be currently involved with an employer.

Note:

- Tuition, materials, equipment and transportation fees will be covered through the Dual Credit program.
- All students are expected to attend an orientation session prior to taking part in any Dual Credit program.
- Students will be contacted by the SCWI Program Assistant, at least one week prior to the start of the program, to be provided with a date, time and location for each orientation session.
- Delivery: Day release (one day per week from September until June) to complete the program -required 240 hours.
- Students involved in this program will be excused from their regular classes or co-op to attend the College.
