

Putting Ontario at the forefront of innovation

AI, robotics and other advancements are revolutionizing the workplace. To ensure Ontario has the workforce it needs to drive prosperity and promote strong communities, college education must be at the forefront of this transformation.

Students need access to cutting-edge technology and the most up-to-date equipment to ensure their skills align with advancements in the workplace.

Students also need more opportunities to participate in applied research projects with businesses. These opportunities stimulate creativity and allow students to contribute to innovations that make businesses more efficient and create new jobs.

Colleges will be looking to Ontario's next government to:

- Invest in new technology and new equipment at Ontario's colleges.
- Collaborate with colleges on improvements in flexible learning.
- Ensure students in every region have access to high-quality internet service.
