

THE CENTER FOR INTERNATIONAL TRADE AND TRANSPORTATION

Connecting and Empowering the Trade and Transportation Workforce

Since its establishment in 1999, CITT has delivered education programs, innovative research, and community outreach in the areas of goods and people movement.

10 FACTS ABOUT CITT

Since 2013, CITT has secured more than \$10 million dollars in grant funds to support education and outreach programs.

CITT has received millions of dollars in funding from the U.S. Department of Transportation, Caltrans, Volvo Research Education Foundations, National Science Foundation, and other public- and private-sector organizations.

CITT has been the home to six major research centers.

METRANS Transportation Consortium, Pacific Southwest Region (PSR) University Transportation Center, the National Center for Sustainable Transportation (NCST), the National Network for the Transportation Workforce (NNTW), the Southwest Transportation Workforce Center (SWTWC), and the California State University Transportation Consortium (CSUTC).

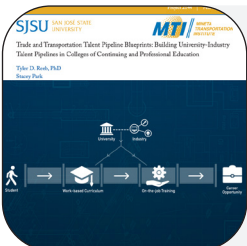

CITT hosts the annual [State of the Trade and Transportation Town Hall](#) meeting.

The Town Hall meeting convenes members of industry, academia, and government to discuss the most pressing topics regarding the ports. It provides a rare opportunity for stakeholders to share insights and to connect face-to-face.

CITT co-hosts the [International Urban Freight Conference](#) in partnership with the METRANS transportation consortium.

The International Urban Freight Conference (I-NUF) is the premier biennial conference that addresses all aspects of city logistics and goods movement in the world's metropolitan areas. The conference brings together practitioners, researchers, and experts from around the world.

CITT has published and contributed to over 100 journal articles, policy papers, and other research publications since its inception.

[Our portfolio](#) consists of research, white papers, and policy initiatives in workforce development, labor market analysis, and applied research in logistics operations and freight policy.

CITT conducts trainings across the educational spectrum from K-12 to higher education.

Our education programs focus on a range of in-demand targeted knowledge, skills, and abilities for tomorrow's trade and transportation workforce.

CITT conducts contract and customized training for a variety of public sector organizations and private industry groups.

We are positioned to design and implement short courses (from one day to one week) that provide overviews of logistic topics, or immersive deep dives, project- or capstone-based academies leading to certifications, hybrid classes, and grant-based pilot programs.

CITT's flagship training program is the Global Logistics Professional program (GLP).

The program is designed to meet the unique needs of individuals at various stages of their careers in this ever-growing and changing field. Taught by industry experts, students gain practical information about the industry and develop the necessary critical thinking and research skills to grow as professionals.

CITT annually secures scholarship and endowment funds for student support.

These funds are available for students to pursue professional development and training in trade and transportation. Many of these scholarships are unique in providing support to non-traditional and non-degree-seeking students who normally do not have access to more traditional sources of financial aid.

CITT has won several awards in workforce development training and research.

We were awarded the 2019 Opportunity and Empowerment Award by the LA American Planning Association; the 2019 National Engagement Award by the University Professional and Continuing Education Association (UPCEA); the 2018 Regional Engagement Award by UPCEA; the 2017 International Achievement Award by the International Business Association of Southern California; and the 2007 Outstanding Program Award by UPCEA.
