Associate Safety Guidelines

- Covid-19 health and safety training completed prior to first day back to work.
- Associates are required to wear face masks while on shift. Face masks are provided daily to associates.
- Additional PPE (personal protective equipment) will be provided in line with specific work tasks.
- Associates are trained on proper handwashing techniques and single use glove wear.
- Unit managers will emphasize the need to maintain cleaned, sanitized and disinfected work areas throughout the workday.
- Plexi shields have been added in a few key areas in order to maintain physical distancing.
- Associates must complete daily health assessment before starting work, including temperature checks.
- Handwashing stations are available at each work area.
- Disinfection logs are in high-touch areas in the front of house and back of house
- Employees will be reminded of the most effective ways to prevent the transmission of COVID-19
  - Wash hands often (every hour and / or when beginning a new task)
  - Avoid close contact with others and remain at least 6’ or 2 metres apart
  - Wear face coverings
  - Avoid touching face coverings
  - Monitor health and be alert to symptoms
  - Associates will remain at home if feeling unwell.
