

# Kindness is Beautiful

Kindness is beautiful even if there just words they shine bright into people's heart so people create quotes to shine even brighter into people's heart

Be kind it 'll make life better for yourself & others  
-Ellen Burgan

This quote means a lot when it says it can change your life. It inspires me that it can do that even the smallest act of kindness in these wrecked days. When somebody is kind to me it makes me feel good enough to spread more kindness and because of that reason I chose this quote. To make people feel better inside i will be writing this quote on a rock and place outside then somebody will spot it, pick it up and their day will be nice! People are gifted creatures so let's make them feel more like that! This is the quote and it's very inspiring!
