 Outdoor areas <ul style="list-style-type: none"> <li>Skating rink</li> <li>Sports field</li> </ul>	 During physical activities, if a physical distance of 2 m is maintained					
 School transportation and public transit						
 Theatre and auditorium <sup>5</sup> Once a person has taken their seat as a spectator	 A physical distance of 2 m must be maintained between students from different class groups				 A physical distance of 2 m must be maintained	 A physical distance of 2 m must be maintained

- These guidelines do not apply to preschool students.
- Any individual carrying out work at the school (e.g. guest speaker, science facilitator) is subject to the guidelines pertaining to wearing a procedural mask in the workplace.
- The creation of groups with students from different class groups should be limited as much as possible. If this is not possible, a 2-metre physical distance should be maintained between students, and a physical barrier should be used to separate students from different class groups. However, if respecting this measure would entail isolating students, students may be grouped together within a "stable daycare group."
- Procedural masks are mandatory in all indoor spaces, except when individuals are swimming or carrying out other water-based activities.
- Students from one stable class group may perform in front of an audience that consists of students from ONE other stable class group only.

Rules pertaining to procedural masks complement the other health measures in place.
