

GEOGRAPHY- AIM HIGH 1, 2, 3.

This course is designed to give our Aim High students a modified geography program that follows alongside with many of the aspects being taught in the Secondary 1 mainstream. We will take a journey into the earth and see how it is made. The students will look at how weather and climate affect peoples' lives. We will look at how towns and cities and where people live change according to the environment of a given location. Students will become familiar with countries and borders and perhaps ponder why some countries hold more power than others.

This course offers our students' a broad based view of Quebec and Canada. The students will learn to recognize and become more familiar with the region in which they live and the provinces within our Country.

Course Content:

1. Quebec and the Provinces and Territories of Canada.
2. Global view of the continents.
3. Climates and locations.
4. Waterways, Borders, and Countries.

Competencies: (QEP. Pg. 189)
