Mitsubishi Electric Sales Canada Inc. Introduces the Hybrid Heating and Central Cooling System

Markham, Ontario – February 26, 2024

Mitsubishi Electric Sales Canada Inc. is proud to announce the launch of the Hybrid Heating and Central Cooling System for residential applications. This new Mitsubishi Electric system connects with any thermostatically controlled furnace* and is available in capacities from 18,000 to 42,000 Btu.

The Hybrid System empowers homeowners with a furnace to improve their home comfort and sustainability by utilizing an energy-efficient electric heat pump when outdoor temperatures permit, switching over to the furnace during more frigid conditions. The switchover automatically occurs when the temperature outside drops below a specified point, which is pre-set during installation.

Mitsubishi Electric's Hybrid System provides the best of both worlds – highly efficient heating and cooling through superior heat pump technology, using the furnace only as a backup heat source. The reduced operation of the gas or propane furnace results in 30% less GHG emissions.

The ideal solution for cold Canadian climates, the Hybrid System comes in standard heat pump or Hyper Heat, Mitsubishi Electric's Cold Climate heat pumps.

Other Key Benefits and Features Include:

- Flexible Installation:
 - Vertical, downflow and horizontal left/right
 - Control box can be mounted anywhere
- Smaller copper tube diameter with grooved design provides more efficient heat transfer
- Flare piping connections for quick, clean, and simple installations with no need for brazing
- Automatically switches between heat pump and furnace operation to ensure comfort and maintain efficiency
- High quality drain pan material with low moisture absorption and high heat capability

For more information on this and other products, dealers are encouraged to contact a local distributor at: **[MitsubishiElectricHybrid.ca](https://www.mitsubishielectric.com/hybrid)**

About Mitsubishi Electric Sales Canada:

Mitsubishi Electric Sales Canada Inc. was established in 1979 as a subsidiary of the Mitsubishi Electric Corporation of Japan. Since then, Mitsubishi Electric Sales Canada Inc. has been at the forefront of heating, cooling and ventilation technology, sales, installation, and service. With over 100 years of experience in providing reliable, high-quality products to both corporate clients and general consumers all over the world, Mitsubishi Electric Corporation is a recognized world leader in the manufacturing, marketing and sales of electrical and electronic equipment used in information processing and communications, consumer electronics, industrial technology, energy, transportation and construction.

*Furnace must comply with ANSI-Z21.47.CSA2.3. Excludes oil and drum type furnaces.
