

## Mitsubishi Electric Sales Canada Inc. Launches The FS Wall Mounted Hyper-Heat Plus Heat Pump

**Markham, Ontario July 15, 2021** Mitsubishi Electric Sales Canada Inc. introduces their most advanced model yet, the FS Wall Mounted Mini-Split System, featuring patented Hyper-Heat Plus technology.

Mitsubishi Electric's **Hyper-Heat Plus Technology**, fueling the FS model, delivers 100% heating performance at -20 °C, and sustains high efficiency in temperatures as low as -25°C.

With a wide range of amazing benefits, the Energy Star® rated, FS model comes with a **12-year extended warranty** on parts and compressor (for approved combinations), Mitsubishi Electric Sales Canada's best warranty offering to date.

*"This has been a product our customers have long waited for and we are excited to bring this to market"*, Geoff Sharman, Residential Product Manager.

The FS model is engineered with other patented technologies that are unique to Mitsubishi Electric as well.

**The Dual Barrier Coating** prevents dust and dirt from accumulating on the inner surface of the heat pump. Blended "fluorine particles" prevent hydrophilic dirt penetration and "hydrophobic particles" stop hydrophobic dirt from getting into the system. This allows the key internal heat pump components to remain clean.

The FS model is equipped with **Nano Platinum Filters** that efficiently break down bacteria, mould, and odours while the **Deodorizing Filter** ensures odorous components are destroyed at the source. **The Electrostatic Anti-Allergy Enzyme Filter** neutralizes viruses, bacteria, and allergens for better breathing, filling a space with fresh air.

Additionally, the **3D i-see Sensor** on the FS model scans the entire room, ensuring even room temperature is delivered. The i-see sensor is able to detect if people are in the room and is able to turn on/off accordingly.
