## **Mitsubishi Electric Formally Launches Climaveneta Hydronic Heat Pumps**

**Markham, Ontario April 27, 2020.** Mitsubishi Electric Sales Canada (MESCA) introduces CLIMAVENETA NX-N Hydronic Heat Pump Units, the first of many Climaveneta products to be introduced to the Canadian Market.

Climaveneta is a brand of Mitsubishi Electric. Headquartered in Italy, Climaveneta is a leading global brand in central climate control systems for comfort and process cooling, as well as the growing IT cooling sector, with over 45 years of experience in the design, manufacturing and marketing of high efficiency, reliable, and sustainable heating and cooling solutions. Climaveneta supports some of the most demanding projects worldwide

NX-N Reversible Heat Pumps are available from 40-225 kW cooling capacity, with 14 different sizes offered, and are available with optional desuperheater for heat recovery function. Whether it is a new build or a retrofit, Climaveneta NX-N units can be used in combination with any hydronic equipment, from any manufacturer, making it an ideal choice for retrofits and energy efficiency upgrades. The Climaveneta NX-N product family can also be used as the sole heating and cooling solution, and depending on temperature conditions, can significantly reduce the buildings annual carbon footprint compared to a traditional chiller and boiler strategy.

With more Climaveneta products and innovative technologies to come, Mitsubishi Electric Sales Canada has the perfect highly efficient, sustainable comfort solutions to realize your vision on your next project in the low-carbon economy.
