

Dr. Nalin Bhargava

I believe that the dentists of Ontario can be proud of the world class oral health care that the citizens of Ontario currently experience. The RCDSO is the official regulator of the province as set out in provincial law (RHPA). The RCDSO is also a resource for the profession in terms of the delivery of universal guidelines, protocol and standards of practice. I believe in order for this quality of care to continue the RCDSO must regulate with fairness, openness and transparency. Equally important, the RCDSO should always strive to be the best possible resource to the profession so that the delivery of world class oral health care continues. It would be my privilege to once again serve as District #1 Governor for the RCDSO. Thank you.
