

Dr. Neil Gajjar

As demonstrated by my CV, I have been actively involved with organized dentistry since my graduation from dental school in 1999. During that time, I have held positions for both council and non-council committees at the Royal College of Dental Surgeons including Quality Assurance, Discipline, and PLP committees.

In addition, I have held numerous positions with the Academy of General Dentistry in Chicago, IL and have served as President of this association with 40,000 members making it the world's second largest dental organization after the American Dental Association. I have also served in positions with the Ontario Dental Association, Canadian Dental Association, and the South Asian Dental Association. This coupled with the over 2000 hours of continuing education hours taken during my career have given me the experience necessary to be a candidate for RCDSO council.

As a practising dentist in Mississauga and my active involvement in organized dentistry, I believe I have demonstrated that I possess the core competencies of Values and Behavior, Relevant Knowledge and the skills and abilities necessary to serve my district as a council member.
